

RI TRANSPARENCY REPORT

2020

Bâtirente

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

SG 01 CC Mandatory to Report, Voluntary to Disclose Descriptive General

SG 01.6 C0

Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

Over the last years, we developed a variety of interventions based on climate-related issues:

- 1. We've been a founder and one the earliest signatories to the Montreal Carbon Pledge and have been measuring the carbon footprint of our equity portfolios since 2014:
- 2. As we gained knowledge of the areas of our portfolios where the larger carbon emissions were to be found, we started trying to understand how we could reduce the global footprint without impairing our strategic investment preferences. For instance, we have chosen low volatility equity strategies for our retiree oriented diversified funds; these tend to be carbon intensive. Thus, we could undertake a discussion with our asset manager and others not under contract to see if the need for low carbon and low volatility could be balanced;
- 3. We have had the conviction that we should invest directly in the transition. This is why in 2015 we invested in a global sustainable growth equity strategy that concentrates the portfolio into sustainabilty solutions in the fields of renewables, water, waste management and health;
- 4. In 2019, our listed real estate portfolio was turned into a full fledged ESG strategy. That means the fund invests only in the top ESG tier in various global markets;
- 5. Since 2006, we have practised corporate engagement at high scale. Climate issues have held an important place in the variety of ESG issues that have been covered with a diversity of companies.

We thus felt we needed an integrated, consistent and cohesive policy to connect all those dots and to state quantifiable objectives that were to be achieved through these various approaches.

This is why we spent a good part of 2019 working on the development of an integrated Cimate policy to be submitted to our Board of Directors in May 2020.

O No

SG 01.7 CC

Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Describe the associated timescales linked to these risks and opportunities.

We have studied a variety of papers (GIEC, Mercer, PRI's IPR) and calls to action (IOPS, Canadian Expert Panel, NFGFS) and have come to the conclusion there is sufficient evidence that the timescale is short and the impacts are to be massive to say the least. As a consequence, we didn't think it was necessary to undertake additional measurements and worked with the usual asumption of a need to half carbon emissions by 2030 and to phase out by 2050. These targets will be at the heart of the proposed Climate policy our Board will decide upon and drive the action plan that will support the objectives over time.

O No

SG 01.8

Indicate whether the organisation publicly supports the TCFD?

O No

SG 01.9 CC

Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Describe

Bâtirente has been deploying responsible investment strategies for some fifteen years. These strategies are based on our Guidelines for Managing Non-financial Risk, approved in 2005, and on the Principles for Responsible Investment, and we summarize them in the following areas: invest, engage, measure and collaborate. Climate change is certainly one of the predominant themes that have marked our action over time. Measuring the carbon footprint, green bonds, shareholder engagement and the introduction of impact strategies in equities and real estate are the means we have deployed on this theme to date.

The causes and impacts of climate change are multiple and require differentiated approaches. Making a positive contribution to the transition to an economy aligned with the objectives of the Paris Agreement requires a multifaceted approach. It is necessary at the same time to reduce greenhouse gas emissions, facilitate the financing of solutions and convince companies to commit to increasing their energy efficiency, migrating to renewable energies and even, for some, transforming their business model.

For Bâtirente, the deployment of the assets needed to make the transition to a low-carbon economy must take place on three levels:

- at a high level, through its investment strategy and its allocation between different asset classes and managers;
- at the level of its managers through their choice of securities;
- and, at the portfolio level, by the companies owned and their business strategy.

Finally, Bâtirente is aware of the need to continue to take action with governments and regulators and will continue to work with its various partners on this issue.

Our recently developed climate policy, which will be submitted to the Board of Directors for adoption in May 2020, is therefore deployed in the following four areas:

- 1. Gradually reducing our exposure to climate risk
- 2. Investing in transition
- 3. Targeting climate impact in our shareholder engagement
- 4. Collaborating with our partners

Each area is coupled with ambitious and measurable objectives with realistic action plans.

Describe your policy on managing potential conflicts of interest in the investment process. Our global investment policy states that all investment decisions are entrusted to third party asset managers who are contractually bound to divulge conflicts of interest, that asset valuations are delegated to our fund administrator and that our proxy voting is done through a third party provider according to structured guidelines assures a fairly reliable structure in terms of conflicts of interest management.

On top of that, in 2017, our Board adopted a Code of Ethics that binds all directors and staff. The Code puts in place processes aimed at preventing such conflicts through transparency measures. For example, any staff is subject to mandatory declaration of all gift, gratuity or any likewise offer. This is done in order to prevent undue influence over employees who for instance, may be involved in the asset manager selection, appointment and monitoring processes.

In 2005, we chose to assign responsibility for monitoring this policy to a specialized committee of the Board. Thus, the investment committee had no control over ESG issues and the RI committee had no control over investment issues. In December 2017, our Board merged the two committees into one (IERM) responsible for both dimensions of the investment activity. Since this committee meets ten times a year, rather than four times in the case of the RI committee, ESG and RI issues are now addressed twice as frequently.

Persuant to the implementation of this merger, every IERM meeting covers both financial and extrafinancial themes. As well, committee the context of the implementation of this merger, every IERM meeting covers both financial and extrafinancial themes. As well, committee the context of the implementation of this merger, every IERM meeting covers both financial and extrafinancial themes. ⊻ Imp	rove ESG ratings of portfolio
	Key performance indicator
	ESG investment weighting.
	Progress achieved
	We have made progress in three areas:
	Increased size of the green bond mandate representing 15% of our bond portfolio;
	 Increased size of assets allocated to the global equity mandate focused on sustainable growth from 6% to 10%; Migrated from a listed global real estate mandate to a listed sustainable global real estate mandate.
	Since the end of 2018, we can say that approximately 13% of Bâtirente's assets are directly directed into investment strategies that promote the energy transition. This is well above the target indicated by Cristina Figueres in her speech at the PRI in Person Conference in Berlin in September 2017.
l Z Soti	ting carbon reduction targets for portfolio
	and control reduction targets for portrollo
	Key performance indicator
	The target we are considering for our upcoming Climate policy is a fifty percent carbon emissions reduction by 2025.
	Progress achieved
	As mentioned we put great efforts in the design of our Climate policy to be adopted in May 2020 and implemented thereafter.

	Carbon footprint
ı	Key performance indicator
	Carbon footprint of our equity portfolios.
	Progress achieved
₹ Oth	Since 2015, Bâtirente has been measuring the carbon footprint of its equity portfolios on an annual basis. After four years of carbon footprinting, we have gained a better understanding of how our investment practices impact the footprint of our portfolios. We now feel confident we can undertake a new step in this ambition by developing a consistent climate policy that will be the occasion to set footprint reduction targets, distribute our carbon budget amongst our equity asset managers, better define the objectives of our engagement policy with regards to climate impact, continue to expand the scope of our alllocations to impact dedicated assets and assess the extent to which we could incorporate our fixed income portfolio into this climate policy. We expect to adopt our Climate policy in May 2020. er, specify (2)
	Other description (2)
	SDGs Impact footprint
	Key performance indicator
	SDGs Impact footprint of our global equity portfolios.
	Progress achieved
	In 2018, we measured the impact of our global equity portfolios in terms of sustainable development and the UN SDGs. We profited from the Impact-Cubed offer to participate in their pilot measurement of that impact through their just launched new tool. We were keen to know what outcome we would observe for our various global equity portfolios, especially regarding our Sustainable Growth Fund. In aggregate we were satisfied with the very strong performance of the latter. Another of our funds did very well through that SDG lens. SDGs would definitely represent a next step once we're done with the climate policy and its implementation.

	Key performance indicator
	Hours spent on RI initiatives. Vivacity of the Quebec PRI Network.
	Progress achieved
	We have maintained the high level of our involvement in the Réseau PRI Québec, where our CEO is Chair of the Public Policy Advisory Committee (PPAC).
1	Members of the PPAC devoted a good amount of time to make representations and policy suggestions to Canadian Expert Panel members.

The local pension and benefits association, ARASQ, held it's first Sustainable Investment Conference in October 2019 and was a great success with more than 250 participants mostly new comers to ESG issues As well the Francophonie PRI committee continued its activities in 2019. Among others it held a well attended side event at the PRI in Person in Paris. It published it's quarterly newsletter and translated eight new PRI practical guides. **☑** Encouraging others to join a RI initiative Hours spent promoting RI to other investors Our CEO spent considerable amount of time in the preparation of the October 2019 ARASQ Sustainable Investment Conference panel on fiduciary responsability. The objective was to educate the audience that comprised a good number of pension trustees about the legal foundations of fiduciary duties in the context of Quebec's Civil Code and pension legislation considering many trustees are confused about their expected behavior towards ESG issues and climate change in particular. One of the central conclusions was that they need to resort to expert advice to confirm the materiality of ESG issues from a risk and opportunity standpoint and allow beneficiaries to support such undertaking. ☑ Documentation of best practice case studies Disseminate Batirente's knowledge in the RI field. Our CEO was a Climate Change Governance panel member at Canada's RIA April 2019 Annual Conference in Montréal where he could describe Bâtirente's experience in developing investment strategies supportive of climate change and transition to a low carbon economy ☐ Using case studies to demonstrate engagement and ESG incorporation to clients Other, specify (1) Other, specify (2) Other, specify (3) ☐ None of the above General Indicate the internal and/or external roles used by your organisation, and indicate for each whether they have oversight and/or implementation responsibilities for responsible investment. ■ Board members or trustees ✓ Oversight/accountability for responsible investment $\hfill \square$ Implementation of responsible investment ☐ No oversight/accountability or implementation responsibility for responsible investment ✓ Internal Roles (triggers other options) Chief Executive Officer (CEO), Chief Investment Officer (CIO), Chief Operating Officer (COO), Investment Committee ✓ Oversight/accountability for responsible investment lacktriangledown Implementation of responsible investment $\hfill \square$ No oversight/accountability or implementation responsibility for responsible investment ☑ Other Chief-level staff or head of department, specify Senior Manager - Corporate & Institutional Affairs ☑ Oversight/accountability for responsible investment ☑ Implementation of responsible investment ☐ No oversight/accountability or implementation responsibility for responsible investment ☐ Portfolio managers □ Investment analysts Dedicated responsible investment staff

Oversight/accountability for responsible investment
 Implementation of responsible investment

SG 07.

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

Board members:

Bâtirente's Board of Directors gives the Investment and Extrafinancial Risks Management Committee (IERM) the mandate to monitor the implementation and updating of the Guidelines. The Committee oversees the compliance of asset managers and other providers in discharging their mandates (portfolios, voting, shareholder engagement).

Batirente's CEO and two members of its Board of Directors, one of them chairman of the IERM committee, are members of the Board of Directors of Æquo Shareholder Engagement Services, our engagement services provider.

CFO:

The CEO is a member of the IERM committee. The Investment Strategy Manager and the Senior Manager - Corporate & Institutional Affairs also participate in IERM committee meetings. This team oversees the investment strategy as well as all aspects of RI implementation by third parties.

Investment Strategy Manager and Senior Manager - Corporate & Institutional Affairs:

As a part of their supervising activities with external portfolio managers, they are responsible for leading asset managers to:

- Integrate consideration of ESG risks into their portfolio building process.
- Become signatories to the Principles for Responsible Investment (PRI).
- Implement shareholder engagement practices, when Bâtirente Funds participate in mutual funds of which they are the sponsor
- . Be familiar with these Guidelines.
- · Develop their voting exercise policy.
- Submit appropriate reports accounting for their integration, engagement and voting rights exercise activities.

SG 14.7 CC Describe in further detail the key targets

Target type	Baseline year	Target year	Description	Attachments
Intensity target	2018	2025	Reduce carbon intensity emissions attributable to equity portfolios by 50% from their baseline year by target year.	
Absolute target	2018	2025	Double the size of impact investments by target year.	
Intensity target	2018	2025	Increase climate-related engagements in the overall engagement program.	
Absolute target	2018	2025	Commit to increase collaborative engagements by one engagement increment per year to reach five by target year.	

SG 14.8 CC

Indicate whether climate-related risks are integrated into overall risk management and explain the risk management processes used for identifying, assessing and managing climate-related risks.

✔ Processes for climate-related risks are integrated into overall risk management

Please describe

Our overall risk management process is defined in our investment policy statements that will incorporate our Climate policy targets alongside existing diversification, strategic asset allocation, benchmarks, management styles, factors, corporate engagement, and others, to form our own cohesive risk management system. Climate targets will thus add to robustness of the global mechanism to cope with the new risk dimensions brought about by climate change.

O Processes for climate-related risks are not integrated into overall risk management

SG 14.9 CC

Indicate whether your organisation, and/or external investment manager or service providers acting on your behalf, undertake active ownership activities to encourage TCFD adoption.

✓ Yes

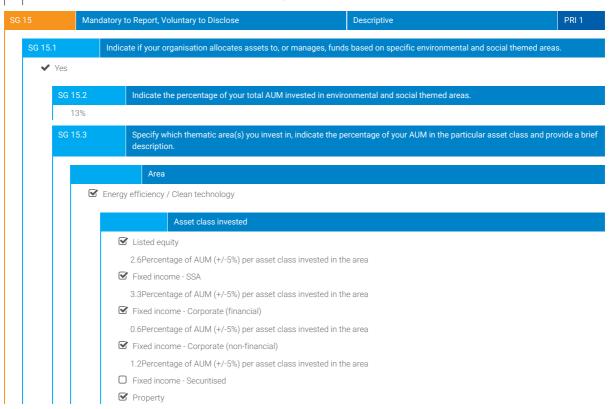

Please describe

Aequo our corporate engagement service provider systematically engages investee companies in the Oil & Gas, Financial Services, Public Utilities (Energy Producers), about TCFD-relevant issues such as:

- Scenario analysis
- Climate change oversight by governance instances
- Climate change incorporation to risk management systems
- Climate change data measures and disclosure

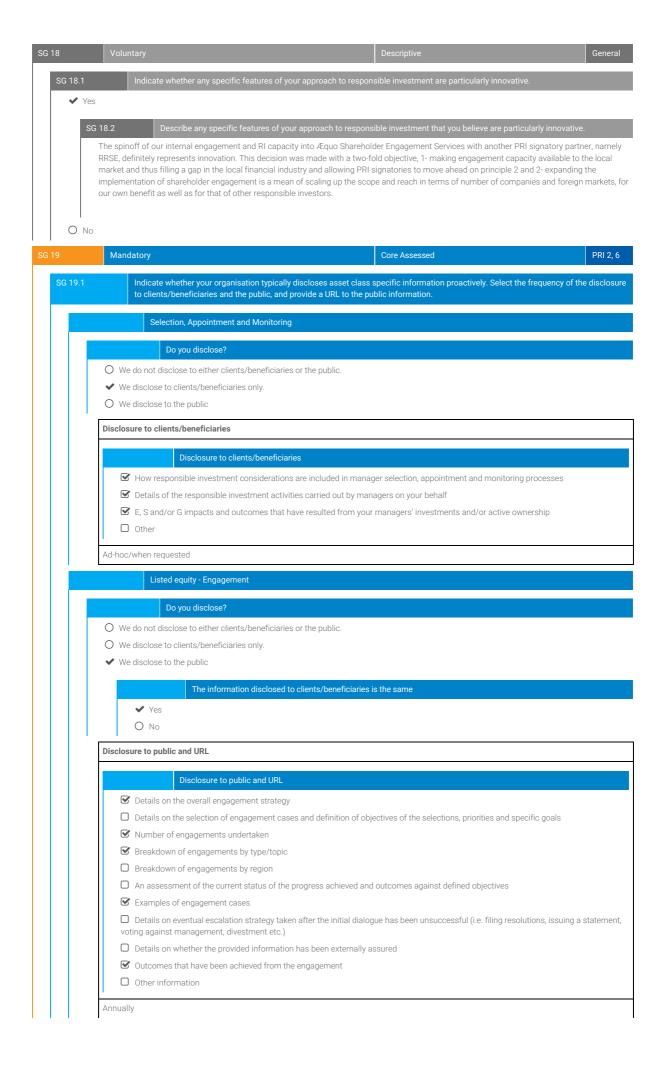

In other sectors these themes are raised with companies when relevant on a case-by-case basis.

- O No, we do not undertake active ownership activities.
- O No, we do not undertake active ownership activities to encourage TCFD adoption.

	5.3Percentage of AUM (+/-5%) per asset class invested in the area
	☐ Commodities
	Aware of the need to immediately start deploying ambitious solutions to accelerate the transition to a low-carbon economy, in November 2015, Bâtirente entrusted AGF, a management company based in Toronto, with the management of a global equity portfolio built around the theme of sustainable growth without involvement in fossil fuels that will provide exposure to environmental solutions in the areas of water and wastewater management and treatment, energy and electricity technologies, health and safety, healthy lifestyles, waste management and pollution control.
	In November 2017, we allocated 2.5% of our assets under management to a fund dedicated entirely to green bonds. In December 2018 we allocated an additional 2%.
	In 2019, we redeployed our listed global real estate assets to the new ESG global real estate fund listed by our manager.
	Thanks to these major investments, Bâtirente now has nearly 13% of its total funds invested directly in the energy transition.

We frequently meet managers who propose ESG strategies and when it comes to reviewing existing mandates we like to be ESG options available to us.
SAM 08.2	A	Additional information. [Optional]
All of d	our portfolio r	managers (15) are PRI signatories. In a very large number of cases, they have become so as a result of our representations.
AM 09	Manda	tory Additional Assessed PRI 1,6
SAM 09.1		Provide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for your organisation during the reporting year.
☑ Ac	d Example 1	
	Topic or issue	ESG integration
	Conducted by	Internal staff
	Asset class	Listed Equity
	Scope and process	Annually the staff meets with each external asset manager to review the process through which it has integrated ESG information into the portfolio construction process. The staff will seek to identify any or all of the following: • Date sources that are used to document ESG issues at firm level; • Examples of companies sold or not selected because of poor ESG performance; • Demonstrate a knowledge of actual ESG performance of investee companies; • Respond to challenges brought by the staff based on information about controversies in which portfolio companies are involved; • Review actual corporate engagement undertaken by the asset manager or any third party on their behalf; • Etc.
	Outcomes	We have had the opportunity to see change at some asset managers. For instance: One asset manager changed its in-house rating system to incorporate ESG data in the ex-ante decision making process instead of an ex-post data point; Another asset manager started to measure the carbon footprint of its pooled funds.
